

DATASHEET

# Crochet

The crochet machine is specially for plain tapes, being ideal tools for elastic or non-elastic ribbons, which are available either in apparel, shoestrings, refurbishing elements, bandages and sporting goods.

## Technical Features

- Stop motion (yarn & rubber) for perfect products.
- State-of-art construction for easy installation and adjustment.
- Integrated weft layer dispenser in easy mounting and dismounting.
- Weft transmission-diversified weft gearing for successful looming.
- Fixed back and forth weft drive for easy adjustment of kinetic pitches.
- 2-stage dispersing roller that keeps the rubber roller in even tension up to max ratio of 2.9.
- The mechanism of crank delivers precision output and fits all type of gauge without grinding.
- Active circulation-type oil supply for easy lubrication of the elements while protecting the machine.
- Weft-rubber device separator for easy management of warp in handy operation that saves time and effort.

## Specification

Operation space	24 inch
Gauge	15, 18, 20G
Weft bar	B3/B8
Density	3.85/inch ~ 39.7/inch
Width-quantity	2"/10, 4"/4
Motor-power	1.5HP.4P
Speed	B3-1500 R.P.M

## Fixtures

- 2 stage of rubber feeding
- Multi-head multi-model yarn frame
- Yarn frame for beam
